📁 PROFESSIONAL EXPERIENCE

July 2023 – present
Navi Mumbai, India

Fyntune solutions, Backed developer
Collaborated with cross-functional teams to design, develop, and deploy Laravel-based API's, web applications, resulting in streamlined user experiences and improved performance

November 2021 –
July 2023
Mumbai, India

Gupta and company, Php developer
Implemented front-end designs using Bootstrap, HTML, and CSS, enhancing user interfaces and ensuring responsive layouts. Utilized version control with Git and GitHub for efficient code management, enabling seamless collaboration with team members. Played a key role in optimizing database performance and data retrieval using MySQL, resulting in reduced query times by 30%

2021 –
November 2021
Mumbai, India

Esda infotech, Jr Web Developer
Jr Web Developer At ESDA Infotech Building Websites On php, Mysql, Wordpress, Managing Clients, Hosting Web Apps On Server etc

📁 PROJECTS

July 2023 – present

Motor insurance, Broker wise insurance quote in 2 min
Successfully developed integrations with numerous Motor Insurance APIs from leading **Insurance Companies (ICs) like Reliance, Future Generali, Liberty Videocon, Kotak Mahindra, Universal Sampo**, and many others.
Worked collaboratively with brokers such as **RenewBuy, Bajaj Capital, Hero Insurance**, and various others to seamlessly integrate these APIs into their platforms. Possesses strong expertise in Laravel framework and API integration methodologies, ensuring efficient and secure data exchange.

May 2022 – July 2023

Vendor compliance
A single, secure portal allows all vendors to upload their predefined set of documents every month
Validators can efficiently review uploaded documents, approve compliant documents, or reject those with discrepancies
Our Vendor Compliance App transforms raw data into actionable insights. Clients can easily track vendor performance based on document submission timelines and approval rates.
Identify consistently compliant vendors and address any concerns with underperforming vendors proactively

November 2021 –
July 2023

Digireg
Internal compliance app: Generate monthly government registers efficiently.
Generate state or central registers for government compliance

April 2022 –
July 2022

Google search clone
Build in react js and Google search api
Build to learn react js and mern stack

January 2022 –
March 2022

Hulu clone, For search movies and ratings and release date etc with tmdb api
Build in react js and tmdb api
Personal project to learn reactjs

October 2021 –
November 2021

Course management system, Academic course management
Build to learn full stack web development in html css javascript jQuery bootstrap php MySQL for academic projects

PROFILE

- **Increased Efficiency and Productivity:** My proficiency in full-stack development and automation tools translates to faster development cycles and reduced maintenance costs.
- **Enhanced User Experience:** My expertise in modern front-end frameworks allows me to create intuitive and engaging user interfaces that drive user satisfaction.
- **Security-Focused Development:** My understanding of DevSecOps principles contributes to a more secure development process, mitigating potential vulnerabilities.
- **Collaborative Mindset:** I thrive in team environments, fostering open communication and knowledge sharing to achieve common goals.
- **Problem-Solving Skills:** Possess a strong analytical mind and a methodical approach to tackling complex challenges.
- **Total Years Of Experience : 3.6, 2 Years in core PHP and 1.5 years in Laravel**

I am confident that my skills, experience, and dedication to excellence will make me a valuable asset to your company. I am eager to contribute to the success of your team and learn from experienced professionals.

EDUCATION

July 2017 – July 2020 **Mumbai University**, Bachelor's in computer science
Mumbai, India

SKILLS

PHP

Leveraged PHP to create scalable, efficient code for custom CMS and e-commerce platforms.

Jquery

Applied jQuery to simplify client-side scripting and enhance user experience

MongoDB

PostgreSQL

Implemented PostgreSQL to handle advanced querying and ensure robust transactional support.

Laravel

Employed Laravel to build robust, maintainable applications with built-in security features.

Reactjs

Bootstrap

Utilized Bootstrap to craft mobile-friendly, visually appealing layouts efficiently

Github

Managed repositories on GitHub to streamline collaboration and maintain code quality.

Elastic Search

Javascript

Wrote JavaScript to create dynamic, user-friendly features and improve engagement.

Mysql

Designed and optimized MySQL databases to ensure fast querying and data integrity.

Redis

Integrated Redis for in-memory caching, reducing latency and improving speed

Supabase

API Integration

vuejs

Built reactive, component-based UIs with Vue.js for faster iteration.

Git

Used Git to track changes and coordinate seamlessly with team members.

Linux

Configured and managed Linux servers to streamline workflows and enhance system reliability.

Docker

Used Docker to containerize applications, ensuring seamless deployment and scalability.

EXTRA SKILLS

Tauri – Developed efficient, native-like apps with Tauri, reducing memory footprint and enhancing performance.

Deno.js – Used Deno.js to build lightweight, permission-controlled applications with zero-config setup.

Firebase Realtime Database – Integrated Firebase for authentication, database, and push notifications, speeding up development.

Go – Developed scalable APIs with Go, leveraging its simplicity and goroutine efficiency . | ..

Bun.js – Adopted Bun.js to accelerate development and execution with its fast, all-in-one runtime.

Rust – Built reliable, low-level applications with Rust, ensuring speed and zero-cost abstractions.

Electron.js – Built desktop applications using Electron.js, delivering rich UIs with HTML, CSS, and JavaScript.

Phpfranken – Utilized FrankenPHP to run PHP apps in a single binary, streamlining setup and performance.

Openswoole – Implemented OpenSwoole to handle real-time tasks and boost server efficiency .

Automation Testing (Selenium) - Nodejs

DevSecOps

Photoshop

Android Developer

Python

JAVA

CERTIFICATES

Database Management Certification

Database Management Certification From NPTEL. For Design The Database And Manage Complex Structures and Optimised Database Management

Laravel Biggner To Pro (Udemy)

Software Engineering

Software Engineering Certification From NPTEL.

- *For developing scalable and maintainable software solutions employing industry best practices for code quality testing and version control*

Cyber Security and Privacy

Cyber Security and Privacy Certification From NPTEL. For implementing robust cybersecurity measures to protect sensitive data and networks from potential threats and attacks

TOOLS

Visual studio code – Proficient

Laragon – Proficient

Datagrip – Proficient
Database management tools by jetbrains

Git – Proficient
Version control tool

Burpsuite – Competent
For testing and security audit of web application

Heidisql – Proficient
Open source database management tool

Wamp – Proficient

MySQL community tools – Proficient

Phpstorm – Proficient
Php development ide by jetbrains

GitHub & GitLab – Proficient
For maintenance of code in remote repo

Postman – Proficient
Api testing tool

Pgadmin – Proficient

INTERESTS

- Bug bounty hunting 
- Java development
- Always eager to learn and adopt new things
- System integrator
- C-sharp
